

erNavigator Cloud Corporate

Cloud Corporate is a secure unique cloud service specially developed for large clients with complex labour & employee relations needs. It provides extensive functionality, powerful analytical capabilities and contextual information to empower both line managers and labour & employee relations teams.

Cloud Corporate is designed for enterprises that need a powerful and configurable solution to meet their specific labour & employee relations requirements. Configure a solution to align with your organisations policies, procedures and operational practices.

Scalability

Cloud Corporate has been successfully implemented in both multi-location site companies and large multi-national corporations across a broad range of industries and can be integrated with existing HR systems via standard API's.

Comprehensive in design but easy to use, Cloud Corporate enables users to work on and report in real time on high numbers of labour and employee relations cases in a collaborative, and efficient way across an entire organisation.

Available Modules

Union & Wage Negotiation

Conflict Management, Grievance & Harassment

Capable

- Improves decision making capabilities by automatically considering all localized legislative requirements
- Guides users through complex and high risk procedures, by delivering relevant contextual information
- Digitizes all paper-based and off system processes
- Increases efficiencies by automating and simplifying routine tasks.
- Promotes process effectiveness and quality by continually governing and measuring consistency, fairness and compliance
- Extends control by centralizing data and providing on-demand powerful reporting and analytical capabilities, shifting the organisation from a reactive to proactive outlook.

Data Protection

Compliant with General Data Protection Regulations
*GDPR) and ISO 27018 for cloud privacy and security

Cloud Security

erNavigator Cloud Corporate is hosted on Microsoft Azure. The tightest security and privacy features possible are embedded in Azure and the systems are completely transparent, so you know how your data is accessed, stored and kept secure

Azure conforms to all global security and compliance standards

erNavigator API
